

Why Choose Kiddom?

Kiddom partners with your favorite high-quality core curricula to transform static materials into interactive teaching and learning experiences. Here are ten Kiddom benefits you're sure to love!

01

Simplify your planning process.

No more juggling multiple teacher guides. With Kiddom, all of your planning, teaching, and assessment resources are in one place!

02

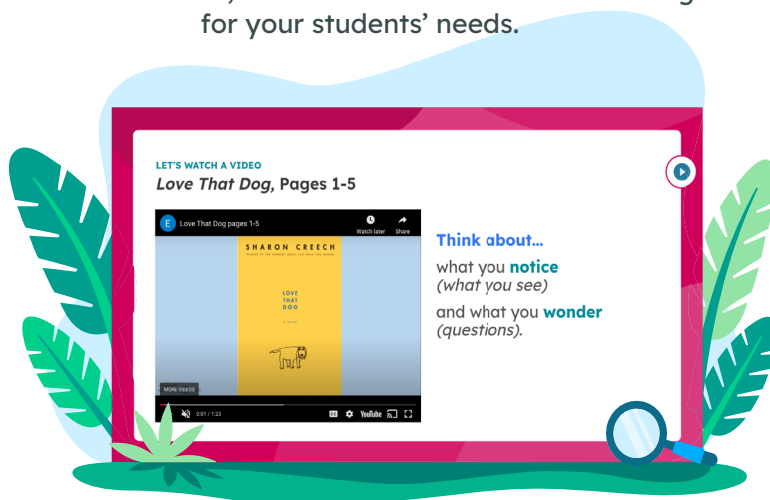

Make it your own with a few simple clicks.

Kiddom allows you to easily edit, add to, and share lessons to tailor learning for your students' needs.

03

Enjoy over 4,000 ready-to-go presentations, with many more to come!¹

We've included all aspects of your trusted curriculum – AND additional expertly-crafted teaching resources so you can spend less time creating lessons and more time doing what matters most.

04

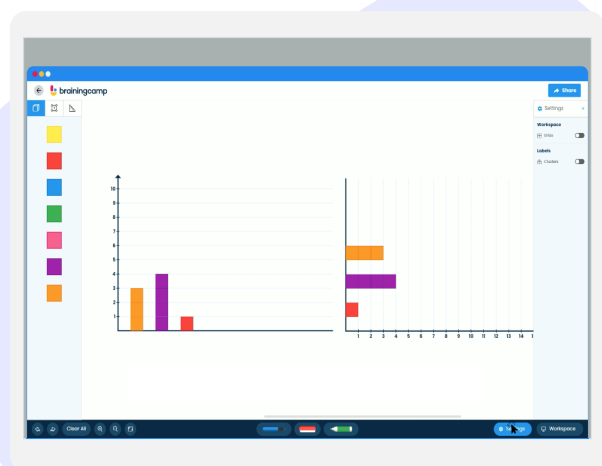

Schedule activities and assignments for future dates.

Kiddom gives you the freedom to schedule assignments, define when the work window closes, and allow student reattempt for additional practice.

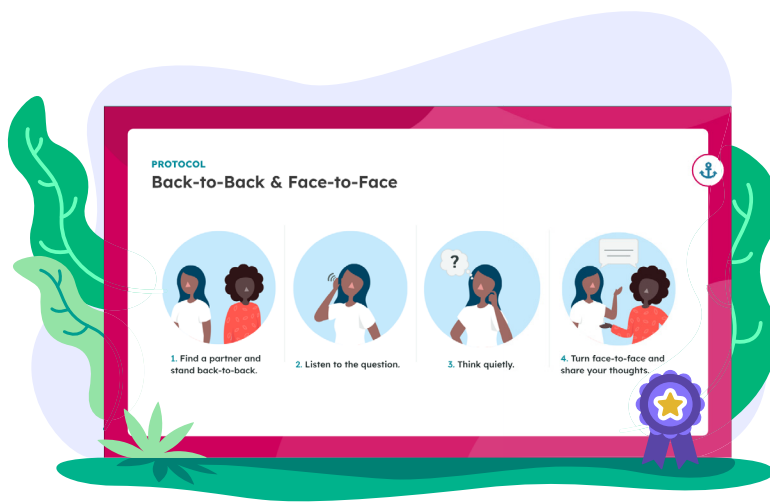

05

Engage your students with interactive tools.

Digital means more choice! Set a teacher-selected response type or promote student ownership with options – audio, video, drawing, graphing, and more.

¹ Applies to EL Education, OUR Math, and Illustrative Mathematics. More presentations are added every quarter.

06

Support learning with projectable resources.

Ready-to-present classroom routines, anchor charts, and word walls save prep time and ensure instructional time runs smoothly.

07

Differentiate for student needs.

Easily group students and assign variations of work to support all levels of learning and growth.

08

Prepare students for high-stakes assessments.

Most state assessments now include technology-enhanced questions. Kiddom's 15 question types, including drag & drop and ordering, ensure students are confident for the big day.

09

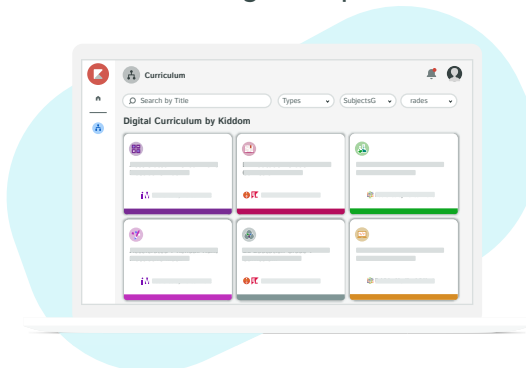

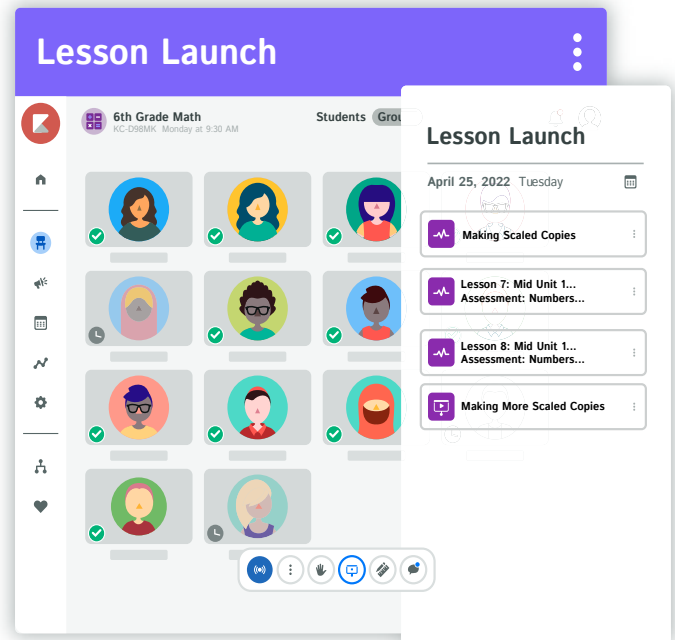

See how students are doing in real time.

Adjust instruction when it counts! Kiddom's Lesson Launch allows you to instantly check comprehension with classwork activities and formative assessments.

10

Assess progress in a way that works for you.

Customize grading based on your preferences – ungraded, participation only, auto-graded, teacher-graded...No problem! Then monitor student growth with standards-aligned reports.

Experience your trusted curriculum in a whole new way!
